

Guaranteed Minimum Analysis

Humic Acids	12.00%
Amino Acid L-Threonine	1.02 %
Amino Acid L-Lysine	0.79%

Derived from: Humic Acids from Leonardite, Amino Acids from L-Lysine monohydrochloride, Amino Acids from L-Threonine.

Nutriclaw is a soil amendment designed to promote micronutrient uptake in plants. Nutriclaw can be applied directly to soil for any type of crop. This product is soluble over a pH range of 2.0 to 12.0, this allows Nutriclaw to be mixed and applied with most commercially available fertilizers and micronutrients. Nutriclaw may provide a source of added organic carbon and potassium, which are necessary requirements for healthy crops.

Directions of Uses: Apply Nutriclaw directly to soil at the rate of 1 to 2 litres/acre or 2.5 to 5 litres/hectare per application. Nutriclaw can be applied 1-4 time per year depending on the soil conditions. If tank-mixed, perform a compatibility jar test prior to mixing in tank. Compatibility can be simply checked by:

- Mixing each product in a clear container in the same proportion to be used in the field
- Agitating vigorously for at least 30 seconds
- Visually observing for precipitate

Storage: Store product in original container in a dark cool dry place. Do not freeze.

CAUTION: Keep out of reach of children and animals. Wear protective equipment including clothing, gloves, eye protection and respiratory protection when using the product. Use appropriate procedures to prevent direct contact with skin and eyes. Wash thoroughly with soap and water after handling. If product gets in eyes, flush eyes with plenty of water for at least 15 minutes, get medical attention immediately. If ingested in mouth, drink plenty of water and get immediate medical attention.
